PROFESSIONAL PROFILE

Aspiring commercial pilot with a solid and growing foundation in aviation knowledge, bolstered by self-study discipline, real-world responsibility, and interpersonal experience. I passed the DGCA Class 2 Medical exam and am currently studying on my own for the DGCA exams. The Regulations exam is scheduled for September 2026, and the Technical General and Meteorology exams are scheduled as soon as possible before the end of 2026.

My preparation involves developing an understanding of aviation regulations, aircraft and technical concepts, meteorology and the operational principles that underpin safe and professional flying. I am particularly interested in building the discipline, situational awareness, decision-making ability, communication and continuous learning required in commercial aviation.

I have experience in corporate documentation, human resources and operations, freelance driving instruction, website design, and online content creation in addition to aviation preparation. My capacity to effectively communicate, collaborate with a variety of people, handle tasks on my own, adhere to organized procedures, and maintain a practical focus has all improved as a result of these experiences.

AVIATION & PILOT PREPARATION

DGCA CLASS 2 MEDICAL: CA-35 and Medical Assessment available - Fit to operate as PIC

DGCA EXAMINATION PREPARATION

- Preparing independently for the DGCA Air Regulations examination, planned for September 2026.

- Studying Technical General and Aviation Meteorology with the intention of appearing for the examinations as soon as possible before the end of 2026.
- Building foundational aviation knowledge through structured self-study and independent learning.
- Developing an understanding of aviation regulations, technical concepts, meteorological principles and their practical relevance to flight operations.
- Maintaining a long-term focus on progressing toward a Commercial Pilot Licence and an airline cockpit career.

AVIATION DEVELOPMENT

- Developing knowledge beyond minimum academic requirements to establish a stronger foundation before formal flight training.
- Familiarising myself with the discipline, responsibility, communication and continuous learning expected in professional aviation.
- Strong interest in commercial airline operations and structured airline pilot training.

CORE SKILLS
